SUBJECT INDEX FOR VOLUME 63, 1986

A

Acidosis
Response to monensin in cattle during subacute acidosis, 888
Acids
Effect of acid and alkali treatment of soybean meal on nitrogen utilization by ruminants, 879
Acrosome Reaction
Glycosaminoglycans in ewe reproductive tracts and their influence on acrosome reactions in bovine spermatozoa in vitro, 861
Additives
Effect of microbial inoculation of whole-plant corn silage on chemical characteristics, preservation and utilization by steers, 1329
Adipose Tissue
Acetyl-CoA carboxylase of sheep adipose tissue: Problems of the assay and adaptation during fetal development, 1119
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
The histology of developing porcine adipose tissue, 642
Age
Age, dose of FSH and other factors affecting superovulation in Holstein cows, 176
Longissimus muscle quality, palatability and connective tissue histological characteristics of bulls and steers fed different energy levels and slaughtered at four ages, 92
Alfalfa
Beef-forage systems for the southeastern United States, 978
Comparison of the effects of three methods of harvesting and storing alfalfa on nutrient digestibility by lambs and feedlot performance of steers, 1026
Evaluation of alfalfa-corn cob associative action. I. Interactions between alfalfa hay and ruminal escape protein on growth of lambs and steers, 894
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Responses to dietary additions of fiber (alfalfa meal) in growing pigs housed in a cold, warm or hot thermal environment, 1870
Ruminal changes in monensin- and lasalocid-fed cattle grazing bloat-provocative alfalfa pasture, 1246
Alkalis
Effect of acid and alkali treatment of soybean meal on nitrogen utilization by ruminants, 879
Alkaloids
Etiology of ammoniated hay toxicosis, 525
Amino Acids
Changes in ruminal concentrations of microbial ammonia and amino acids due to monensin and time, 1990
Comparative availability of amino acids in OAC Wintri triticale and corn for pigs, 1862
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
Effect of meal schedules and fasting on selected plasma free amino acids in horses, 1428
Nitrogen balance and amino acid disappearance from the small intestine in calves fed soybean meal-, toasted soybean meal- or corn gluten meal-supplemented diets, 1258
Ammonia
Changes in ruminal concentrations of microbial ammonia and amino acids due to monensin and time, 1990
Etiology of ammoniated hay toxicosis, 525
Net energy value of ammoniated wheat straw, 2044
Amylases
Effects of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Limits to starch digestion in the ruminant small intestine, 1634
Anabolics
The effect of anabolic agents and breed on the fibers of the longissimus muscle of male cattle, 83
Anaerobic Digesters
Utilization by fattening cattle of unfermented manure and two residues produced by anaerobic generation of methane from feedlot manure, 348
Analysis of Variance
Symmetric differences squared and analysis of variance procedures for estimating genetic and environmental variances and covariances for beef cattle weaning weight: I. Comparison via simulation, 1779
Symmetric differences squared and analysis of variance procedures for estimating genetic and environmental variances and covariances for beef cattle weaning weight: II. Estimates from a data set, 1794
Androgens
Aerosolized 5α-androst-16-en-3-one reduced agonistic behavior and temporarily improved performance of growing pigs, 679
Anestrus
Endocrine changes during restoration of estrous cycles following induction of anestrus by restricted nutrient intake in beef heifers, 565
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prosta-

glandin $F_{2\alpha}$, 343
Animal Breeding Methods
Analysis of selection experiments using mixed model methodology, 245
Bayesian methods in animal breeding theory, 217
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Identifying single genes of large effect in quantitative traits using best linear unbiased prediction, 68
Recent developments in variance and covariance estimation, 208
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087
Antibiotics
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013
Antibodies
Monoclonal antibodies: Pragmatic application of immunology and cell biology, 288
Antioxidants
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905
Apomixis
Developing better forages for the South, 955
Appetite
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Artificial Insemination
Effect of oxytocin, prostaglandin $F_{2\alpha}$ and reproductive tract manipulations on uterine contractility in Holstein cows on days 0 and 7 of the estrous cycle, 151
Autoradiography
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659

B

Bacteria
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
Interaction of ruminal bacteria and fungi with southern forages, 962
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310
Bayesian Theory
Bayesian methods in animal breeding theory, 217
Behavior
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Aerosolized 5α-androst-16-en-3-one reduced agonistic behavior and temporarily improved performance of growing pigs, 679
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Induction of estrus in ovariectomized cows and heifers: Effects of estradiol benzoate and gonadotropin releasing hormone, 546
Influence of feeding time and diet on time of parturition in multiparous ewes, 1036
Bentonite
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923
Best Linear Unbiased Predictor
Analysis of selection experiments using mixed model methodology, 245
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Identifying single genes of large effect in quantitative traits using best linear unbiased prediction, 68
Beta-Adrenergic Agonists
Muscle metabolism and real-time ultrasound measurement of muscle and subcutaneous adipose tissue growth in lambs fed diets containing a beta-agonist, 1410
Biomass
Short rotation, hardwood tree biomass as potential ruminant feed—Chemical composition, nylon bag ruminal degradation and ensilement of selected species, 2028
Utilization by fattening cattle of unfermented manure and two residues produced by anaerobic generation of methane from feedlot manure, 348
Birth Weight
Between- and within-breed genetic analysis of calving traits and survivial to weaning in beef cattle, 27
Bloat
Ruminal changes in monensin- and lasalocid-fed cattle grazing bloat-provocative alfalfa pasture, 1246
Blood Meal
Whey as a source of rumen-degradable protein. I. Effects on microbial protein production, 1561
Blood Sugars
Influence of exogenous growth hormone and gestational diet on sow blood and milk characteristics and on baby pig blood, body composition and performance, 1877
Boar Taint
Effect of active immunization against LHRH or LH in boars: Reproductive consequences and performance traits, 986
Body Composition
Effect of growth hormone-secreting tumors on body composition and feed intake in young female Wistar-Furth rats, 1126
Effects of growth rate and compensatory growth on body composition in lambs, 770
Lean and fat growth patterns of serially slaughtered beef bulls fed different energy levels, 1347
Plasma, rumen and urine pools in urea dilution determination of body composition in cattle, 77
Selection for postweaning gain in rats: I. Correlated response in feed utilization and body composition, 34
Ultrasonic scanning and body measurements for

predicting composition and muscle distribution in young Holstein × Friesian bulls, 1337
Body Measurements
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Prediction of mature cow carcass composition from live animal measurements, 1041
Ultrasonic scanning and body measurements for predicting composition and muscle distribution in young Holstein × Friesian bulls, 1337
Body Water
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Evaluation of urea dilution as a technique for estimating body composition of beef steers in vivo: Validation of published equations and comparison with chemical composition, 1935
Body Weight
Breeding system, cow weight and milk yield effects on various biological variables in beef production, 1361
Breeding system, cow weight and milk yield effects on various economic variables in beef production, 1373
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Equine energetics. I. Relationship between body weight and energy requirements in horses, 815
Estimates of heritabilities and correlations of traits associated with pelvic area in beef cattle, 432
Bones
Effect of dietary fluorine on growth, blood and bone characteristics of growing-finishing pigs, 2053
Effects of age and diet on the development of mechanical strength by the third metacarpal and metatarsal bones of young horses, 1432
Zinc-amino acid complexes for swine, 121
Breeding Season
Lambing date and lamb production of spring-mated Rambouillet, Dorset and Finnsheep ewes and their F_1 crosses, 715
Breeds
Apparent and true digestibility of magnesium in mature cows of five breeds and their crosses, 189
Carcass properties as related to sensory properties of pork, 102
Direct and maternal genetic effects on preweaning characters of Brahman, Hereford and Brahman-Hereford crossbred cattle, 438
Effect of nutrition, age and size on compensatory growth in two breeds of steers, 1968
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781
Forage intake of rangeland beef cows with varying degrees of crossbred influence, 1484
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Processing characteristics of Polypay wool, 692
Butanediol
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156

C

Calcium
Dietary calcium and phosphorus for lactating swine at high and average production levels, 1163
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Effect of various calcium:phosphorus ratios at low and high dietary phosphorus for starter, grower and finishing swine, 457
Calving Interval
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Calving Season
Effect of lasalocid on fall-calving beef cows, 1722
Carcasses
Carcass properties as related to sensory properties of pork, 102
Effect of energy level in lactating sows on yield and composition of milk and nutrient balance of piglets, 1888
Effect of lysine levels in pig starter diets on performance to 20 kg and on subsequent performance and carcass characteristics, 139
Effects of photoperiod on growth, carcass composition, prolactin, growth hormone and cortisol in prepubertal and postpubertal Holstein heifers, 1804
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Future meat-animal composition: Industry adaptation of new technologies, 633
Prediction of mature cow carcass composition from live animal measurements, 1041
Stimulation of pig growth performance by porcine growth hormone and growth hormone-releasing factor, 1389
The effects of rate of change in body weight on tissue development and meat quality of youthful bulls, 1824
Yield grades and cutability of carcass beef with and without kidney and pelvic fat, 1134
Casein
Evaluation of alfalfa-corn cob associative action: II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902

Whey as a source of rumen-degradable protein. II. For growing ruminants, 1574
Castration
Effect of active immunization against LHRH or LH in boars: Reproductive consequences and performance traits, 986
Cattle
Age, dose of FSH and other factors affecting superovulation in Holstein cows, 176
Apparent and true digestibility of magnesium in mature cows of five breeds and their crosses, 189
Beef-forage systems for the southeastern United States, 978
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Between- and within-breed genetic analysis of calving traits and survival to weaning in beef cattle, 27
Breeding system, cow weight and milk yield effects on various biological variables in beef production, 1361
Breeding system, cow weight and milk yield effects on various economic variables in beef production, 1373
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Comparison of the effects of three methods of harvesting and storing alfalfa on nutrient digestibility by lambs and feedlot performance of steers, 1026
Corn particle passage and size reduction in the rumen of beef steers, 1509
Crossing beef X beef and beef X Brown Swiss: Pregnancy rate, calf survival, weaning age and rate, 8
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705
Direct and maternal genetic effects on preweaning characters of Brahman, Hereford and Brahman-Hereford crossbred cattle, 438
Effect of acid and alkali treatment of soybean meal on nitrogen utilization by ruminants, 879
Effect of energy intake after weaning on the sexual development of beef bulls. II. Age at first mating, age at puberty, testosterone and scrotal circumference, 579
Effect of genetic selection for milk yield and increased milking frequency on plasma growth hormone and prolactin concentration in Holstein cows, 1220
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Effect of harvest date on meadow hay quality. II. Particle size degradation and particulate passage from the rumen of growing cattle, 1538
Effect of lasalocid on fall-calving beef cows, 1722
Effect of microbial inoculation of whole-plant corn silage on chemical characteristics, preservation and utilization by steers, 1329
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Effect of nutrition, age and size on compensatory growth in two breeds of steers, 1968
Effect of salinomycin supplementation on characteristics of digestion and feedlot performance of cattle, 1996
Effect of unilateral cornual insemination upon fertilization rate in superovulating and single-ovulating cattle, 551
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781
Effects of marginal selenium deficiency and winter protein supplementation on growth, reproduction and selenium status of beef cattle, 586
Effects of photoperiod on growth, carcass composition, prolactin, growth hormone and cortisol in prepubertal and postpubertal Holstein heifers, 1804
Effects of slaframine on ruminant digestive function: Ruminal motility in sheep and cattle, 1502
Effects of slaughter weight and carcass electrical stimulation on the quality and palatability of beef from young purebred bulls, 1838
Effects of sulfur fertilization on composition and digestion of phenolic compounds in tall fescue and orchardgrass, 1926
Effects of whole cottonseed, cottonseed oil or animal fat on digestibility of wheat straw diets by steers, 1267
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Endocrine changes during restoration of estrous cycles following induction of anestrus by restricted nutrient intake in beef heifers, 565
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Estimates of heritabilities and correlations of traits associated with pelvic area in beef cattle, 432
Etiology of ammoniated hay toxicosis, 525
Evaluation of urea dilution as a technique for estimating body composition of beef steers in vivo: Validation of published equations and comparison with chemical composition, 1935
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995
Forage intake of rangeland beef cows with varying degrees of crossbred influence, 1484
Future meat-animal composition: Industry adaptation of new technologies, 633
Grain processing effects on starch utilization by ruminants, 1649
Heritabilities and genetic correlations of growth and reproductive measurements in Hereford bulls, 409
Implanting young bulls with zeranol from birth

to four slaughter ages: III. Growth performance and endocrine aspects, 747
Induction of estrus in ovariectomized cows and heifers: Effects of estradiol benzoate and gonadotropin releasing hormone, 546
Influence of calf removal on the serum luteinizing hormone response to naloxone in the postpartum beef cow, 561
Influence of forage level on response of feedlot steers to salinomycin supplementation, 2005
Influence of insulin and energy intake on ovulation rate, luteinizing hormone and progesterone in beef heifers, 1228
Influence of zeranol implants and electrical stimulation on the palatability traits of five muscles in Angus and Limousin bulls and steers, 114
Lean and fat growth patterns of serially slaughered beef bulls fed different energy levels, 1347
Limits to starch digestion in the ruminant small intestine, 1634
Longissimus muscle quality, palatability and connective tissue histological characteristics of bulls and steers fed different energy levels and slaughtered at four ages, 92
Mefluidide effects on smooth brome composition and grazing cow-calf performance, 1054
Nitrogen balance and amino acid disappearance from the small intestine in calves fed soybean meal-, toasted soybean meal- or corn gluten meal-supplemented diets, 1258
Nonpuberal estrus in beef heifers, 1049
Opioid inhibition of luteinizing hormone secretion during the postpartum period in suckled beef cows, 1445
Prediction of mature cow carcass composition from live animal measurements, 1041
Prediction of traits at constant finish for performance-tested beef cattle, 1108
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Proportion of types I and III collagen in longissimus collagen from bulls and steers, 453
Regulation of pulsatile LH secretion by ovarian steroids in the heifer, 162
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459
Response to monensin in cattle during subacute acidosis, 888
Ruminal changes in monensin- and lasalocid-fed cattle grazing bloat-provocative alfalfa pasture, 1246
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013
Sulfur influences on rumen microorganisms in vitro and in sheep and calves, 1949
Symmetric differences squared and analysis of variance procedures for estimating genetic and environmental variances and covariances for beef cattle weaning weight: I. Comparison via simulation, 1779
Symmetric differences squared and analysis of variance procedures for estimating genetic and environmental variances and covariances for beef cattle weaning weight: II. Estimates from a data set, 1794
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prostaglandin $F_{2\alpha}$, 343
Synchronized estrus and fertility of beef cows after weaning calves for short intervals, 369
The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737
The effects of anabolic agents and breed on the fibers of the longissimus muscle of male cattle, 83
The effects of corn silage dry matter content and sodium bicarbonate addition on nutrient digestion and growth by lambs and calves, 1728
The effects of rate of change in body weight on tissue development and meat quality of youthful bulls, 1824
The role of ciliate protozoa in nutrition of the ruminant, 1547
Ultrasonic scanning and body measurements for predicting composition and muscle distribution in young Holstein × Friesian bulls, 1337
Utilization by fattening cattle of unfermented manure and two residues produced by anaerobic generation of methane from feedlot manure, 348
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087

Cell Culture
The reversible inhibition of myoblast proliferation by γ-hexachlorocyclohexane, 326

Chemical Composition
Short rotation, hardwood tree biomass as potential ruminant feed—Chemical composition, nylon bag ruminal degradation and ensilement of selected species, 2028

Chickens
Genetic manipulation of the major histocompatibility complex, 279

Chlortetracycline
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013

Cholesterol
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781

Chromatin
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995

Chromic Oxide
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854

Cloning
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310

Colostrum
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905

Connective Tissue
Longissimus muscle quality, palatability and connective tissue histological characteristics of

bulls and steers fed different energy levels and slaughtered at four ages, 92
Proportion of types I and III collagen in longissimus collagen from bulls and steers, 453
Copper
Toxic effects of supplemental copper and roxarsone when fed alone or in combination to young pigs, 533
Corn
Comparative availability of amino acids in OAC Wintri triticale and corn for pigs, 1862
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854
Corn particle passage and size reduction in the rumen of beef steers, 1509
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
Evaluation of alfalfa-corn cob associative action: I. Interactions between alfalfa hay and ruminal escape protein on growth of lambs and steers, 894
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Factors affecting starch digestibility with special emphasis on sorghum and corn, 1607
Grain processing effects on starch utilization by ruminants, 1649
Limits to starch digestion in the ruminant small intestine, 1634
Corn Silage
Effect of microbial inoculation of whole-plant corn silage on chemical characteristics, preservation and utilization by steers, 1329
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
The effects of corn silage dry matter content and sodium bicarbonate addition on nutrient digestion and growth by lambs and calves, 1728
Cortisol
Daily rhythm of cortisol, and evidence for a photoinducible phase for prolactin secretion in nonpregnant mares housed under non-interrupted and skeleton photoperiods, 169
Cottonseed
Effects of whole cottonseed, cottonseed oil or animal fat on digestibility of wheat straw diets by steers, 1267
Crop Residues
Evaluation of alfalfa-corn cob associative action. I. Interactions between alfalfa hay and ruminal escape protein on growth of lambs and steers, 894
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Crossbreeding
Crossing beef × beef and beef × Brown Swiss: Pregnancy rate, calf survival, weaning age and rate, 8
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Cyclic Adenosine Monophosphate
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184
Cytochromes
The influence of dose of phenobarbital and interval to measurement on concentration of liver enzymes in barrows and gilts, 1184
Cytoplasmic Male Sterility
Developing better forages for the South, 955

D

Deficiency
Sulfur influences on rumen microorganisms in vitro and in sheep and calves, 1949
Deoxyribonucleic Acid
Structural analysis of myosin genes using recombinant DNA techniques, 259
Deuterium Oxide
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Development Aid
USAID-supported animal research, 1600
Diallel Crossing
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Diaminopimelic Acid
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
Diarrhea
Diarrhea: The nemesis of the artificially reared, early weaned piglet and a strategy for defense, 1307
Diets
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Effect of lysine levels in pig starter diets on performance to 20 kg and on subsequent performance and carcass characteristics, 139
Effects of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Effects of dietary monensin and potassium on apparent absorption of magnesium and other macroelements in sheep, 1960

Fiber and starch levels in fattening rabbit diets, 1897
Influence of feeding time and diet on time of parturition in multiparous ewes, 1036
Longissimus muscle quality, palatability and connective tissue histological characteristics of bulls and steers fed different energy levels and slaughtered at four ages, 92
The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078
Digestibility
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Apparent and true digestibility of magnesium in mature cows of five breeds and their crosses, 189
Comparison of the effects of three methods of harvesting and storing alfalfa on nutrient digestibility by lambs and feedlot performance of steers, 1026
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
Effects of nitrogen and energy source on nutrient digestibility in the young pig, 492
Effects of whole cottonseed, cottonseed oil or animal fat on digestibility of wheat straw diets by steers, 1267
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Markers for estimating digesta flow in pigs and the effects of dietary fiber, 1140
Milk versus soybean protein sources for pigs: I. Effects on performance and digestibility, 505
Milk versus soybean protein sources for pigs: II. Effects on amino acid availability, 513
Predicting digestibility of different diets with internal markers: Evaluation of four potential markers, 1476
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459
The effects of corn silage dry matter content and sodium bicarbonate addition on nutrient digestion and growth by lambs and calves, 1728
Digestion
Corn particle passage and size reduction in the rumen of beef steers, 1509
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Effect of harvest date on meadow hay quality. II. Particle size degradation and particulate passage from the rumen of growing cattle, 1538
Effects of alkaline hydrogen peroxide treatment of wheat straw on site and extent of digestion in sheep, 868
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Estimating particle turnover in the rumen of meal-fed beef steers: Procedural evaluations, 1469
Factors affecting starch digestibility with special emphasis on sorghum and corn, 1607
Grain processing effects on starch utilization by ruminants, 1649
Limits to starch digestion in the ruminant small intestine, 1634
Markers for estimating digesta flow in pigs and the effects of dietary fiber, 1140
Nitrogen balance and amino acid disappearance from the small intestine in calves fed soybean meal-, toasted soybean meal- or corn gluten meal-supplemented diets, 1258
Potassium and lasalocid effects on performance and digestion in lambs, 685
Short rotation, hardwood tree biomass as potential ruminant feed—Chemical composition, nylon bag ruminal degradation and ensilement of selected species, 2028
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013
Starch digestion and utilization in ruminants, 1624
Dilution
Plasma, rumen and urine pools in urea dilution determination of body composition in cattle, 77
Dystocia
Between- and within-breed genetic analysis of calving traits and survival to weaning in beef cattle, 27

E

Economics
Breeding system, cow weight and milk yield effects on various economic variables in beef production, 1373
Efficiency
Postweaning performance and carcass characteristics of crossbred ewe lambs produced in accelerated or annual lambing systems, 1063
Electrical Treatment
Effects of slaughter weight and carcass electrical stimulation on the quality and palatability of beef from young purebred bulls, 1838
Influence of zeranol implants and electrical stimulation on the palatability traits of five muscles in Angus and Limousin bulls and steers, 114

Embryos
Age, dose of FSH and other factors affecting superovulation in Holstein cows, 176
Dose-response shift in the ability of gilts to remain pregnant following exogenous estradiol-17β exposure, 1208
Intrauterine migration of the porcine embryo: Coordination of bead migration with estradiol, 848
Maintenance of the corpus luteum of early pregnancy in the ewe. IV. Changes in luteal sensitivity to prostaglandin $F_{2\alpha}$ throughout early pregnancy, 1201
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418
Swine management to increase gilt reproductive efficiency, 1280
Energy
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854
Effect of energy level in lactating sows on yield and composition of milk and nutrient balance of piglets, 1888
Effect of lactation and rebreeding phase energy intake on primiparous and multiparous sow performance, 804
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine changes and reproductive performance in primiparous sows, 1915
Effects of age and diet on the development of mechanical strength by the third metacarpal and metatarsal bones of young horses, 1432
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156
Effects of growth rate and compensatory growth on body composition in lambs, 770
Effects of nitrogen and energy source on nutrient digestibility in the young pig, 492
Endocrine changes during restoration of estrous cycles following induction of anestrus by restricted nutrient intake in beef heifers, 565
Equine energetics. I. Relationship between body weight and energy requirements in horses, 815
Equine energetics. II. Energy expenditure in horses during submaximal exercise, 822
Influence of insulin and energy intake on ovulation rate, luteinizing hormone and progesterone in beef heifers, 1228
Lean and fat growth patterns of serially slaughtered beef bulls fed different energy levels, 1347
Responses to dietary additions of fiber (alfalfa meal) in growing pigs housed in a cold, warm or hot thermal environment, 1870
Selection for postweaning gain in rats: I. Correlated response in feed utilization and body composition, 34
Utilization by fattening cattle of unfermented manure and two residues produced by anaerobic generation of methane from feedlot manure, 348
Environment
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Lack of influence of nursery temperature on the response of weanling pigs to supplemental vitamins C and E, 484
The effects of soybean oil on nursery air quality and performance of weanling pigs, 1
Enzymes
Acetyl-CoA carboxylase of sheep adipose tissue: Problems of the assay and adaptation during fetal development, 1119
Equilibration
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Escherichia coli
Diarrhea: The nemesis of the artificially reared, early weaned piglet and a strategy for defense, 1307
Estrogens
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Dose-response shift in the ability of gilts to remain pregnant following exogenous estradiol-17β exposure, 1208
Effect of feed treatment and exogenous estrogen and progestogen on puberty and lambing rates in ewe lambs, 1717
Implanting young bulls with zeranol from birth to four slaughter ages: III. Growth performance and endocrine aspects, 747
Induction of estrus in ovariectomized cows and heifers: Effects of estradiol benzoate and gonadotropin releasing hormone, 546
Intrauterine migration of the porcine embryo: Coordination of bead migration with estradiol, 848
Regulation of pulsatile LH secretion by ovarian steroids in the heifer, 162
Estrus
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Endocrine changes during restoration of estrous cycles following induction of anestrus by restricted nutrient intake in beef heifers, 565
Improving sow productivity through management during gestation, lactation and after weaning, 1288
Induction of estrus in ovariectomized cows and heifers: Effects of estradiol benzoate and gonadotropin releasing hormone, 546
Nonpuberal estrus in beef heifers, 1049
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Regulation of pulsatile LH secretion by ovarian steroids in the heifer, 162
Reproductive responses, progesterone profiles and ovarian characteristics of cycling, fine-wool ewes treated with an inhibitor of progesterone synthesis (epostane), 1072
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prostaglandin $F_{2\alpha}$, 343
Synchronized estrus and fertility of beef cows after weaning calves for short intervals, 369
Exercise
Equine energetics. II. Energy expenditure in horses during submaximal exercise, 822

Experimental Designs
Repeated measurement: Sensitive tests for experiments with few animals, 943

F

Farming Systems
Sheep and goats in tropical and subtropical agricultural systems, 1587
Fat Thickness
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Early-postmortem measurements and conditioning in assessing and enhancing meat quality, 622
Fatty Acids
Acetyl-CoA carboxylase of sheep adipose tissue: Problems of the assay and adaptation during fetal development, 1119
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781
Response to monensin in cattle during subacute acidosis, 888
Feces Collection
Estimating particle turnover in the rumen of meal-fed beef steers: Procedural evaluations, 1469
Feeding
Effect of meal schedules and fasting on selected plasma free amino acids in horses, 1428
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781
Estimating particle turnover in the rumen of meal-fed beef steers: Procedural evaluations, 1469
Influence of feeding time and diet on time of parturition in multiparous ewes, 1036
Response of nonpregnant versus pregnant gilts and their fetuses to severe feed restriction, 472
Feedlots
Effect of salinomycin supplementation on characteristics of digestion and feedlot performance of cattle, 1996
Influence of forage level on response of feedlot steers to salinomycin supplementation, 2005
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013
Feeds
Factors affecting starch digestibility with special emphasis on sorghum and corn, 1607
The effects of sorbic acid in high moisture sorghum grain diets on performance of weanling swine, 831
Fescue
Beef-forage systems for the southeastern United States, 978
Effects of sulfur fertilization on composition and digestion of phenolic compounds in tall fescue and orchardgrass, 1926
Fetus
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659
Response of nonpregnant versus pregnant gilts and their fetuses to severe feed restriction, 472
Substrate utilization by fetal pig skeletal muscle, 1816
The histology of developing porcine adipose tissue, 642
Fiber
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
Fiber and starch levels in fattening rabbit diets, 1897
Interaction of ruminal bacteria and fungi with southern forages, 962
Markers for estimating digesta flow in pigs and the effects of dietary fiber, 1140
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310
Predicting digestibility of different diets with internal markers: Evaluation of four potential markers, 1476
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459
Flow Cytometry
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995
Fluorine
Effect of dietary fluorine on growth, blood and bone characteristics of growing-finishing pigs, 2053
Flushing
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Follicle Stimulating Hormone
Age, dose of FSH and other factors affecting superovulation in Holstein cows, 176
Concentrations of prolactin, luteinizing hormone and follicle stimulating hormone in pituitary and serum of horses: Effect of sex, season and reproductive state, 854
Forages
Beef-forage systems for the southeastern United States, 978
Ensiling characteristics of tropical grasses as influenced by stage of growth, additives and chopping length, 197
Etiology of ammoniated hay toxicosis, 525
Forage intake of rangeland beef cows with varying degrees of crossbred influence, 1484
Influence of forage level on response of feedlot steers to salinomycin supplementation, 2005
Interaction of ruminal bacteria and fungi with southern forages, 962
Microwave-oven drying of forage samples collected via esophageal fistula, 595
Potentials of rabbit production in tropical and subtropical agricultural systems, 1581
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459

The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078
Fractionation
Effect of potassium on association of minerals with various fractions of digesta and feces of sheep fed hay, 1491
Fragmentation
Early-postmortem measurements and conditioning in assessing and enhancing meat quality, 622
Freeze Drying
Microwave-oven drying of forage samples collected via esophageal fistula, 595
Fungi
Interaction of ruminal bacteria and fungi with southern forages, 962

G

Genetic Engineering
Genetic engineering of mammalian embryos, 269
Genetic manipulation of the major histocompatibility complex, 279
Monoclonal antibodies: Pragmatic application of immunology and cell biology, 288
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310
Structural analysis of myosin genes using recombinant DNA techniques, 259
Genetic Gain
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Producing more pigs per sow per year—Genetic contributions, 1275
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087
Genetic Parameters
An analysis of body weights and maturing patterns in Western range ewes, 729
Analysis of selection experiments using mixed model methodology, 245
Bayesian methods in animal breeding theory, 217
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Estimates of heritabilities and correlations of traits associated with pelvic area in beef cattle, 432
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Heritabilities and genetic correlations of growth and reproductive measurements in Hereford bulls, 409
Heritability and repeatability of Hereford showring placing and associated correlations with individual performance measurements and expected progeny differences, 1101
Identifying single genes of large effect in quantitative traits using best linear unbiased prediction, 68
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Prenatal and postnatal influences on growth and fat measurements in swine, 1095
Recent developments in variance and covariance estimation, 208
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087
Gestation Period
Between- and within-breed genetic analysis of calving traits and survival to weaning in beef cattle, 27
Improving sow productivity through management during gestation, lactation and after weaning, 1288
Serum folates in gestating swine after folic acid addition to diet, 1173
Glucose
Changes in metabolic and reproductive characteristics associated with lactation and glucose infusion in the postpartum ewe, 538
Starch digestion and utilization in ruminants, 1624
Glutathione Peroxidase
Effects of marginal selenium deficiency and winter protein supplementation on growth, reproduction and selenium status of beef cattle, 586
Glycerol
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Glycosaminoglycans
Glycosaminoglycans in ewe reproductive tracts and their influence on acrosome reactions in bovine spermatozoa in vitro, 861
Goats
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Sheep and goats in tropical and subtropical agricultural systems, 1587
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078
Gonadotropin Releasing Hormone
Induction of estrus in ovariectomized cows and heifers: Effects of estradiol benzoate and gonadotropin releasing hormone, 546
Growth
An analysis of body weights and maturing patterns in Western range ewes, 729
An approach to pig growth modeling, 615
Carcass properties as related to sensory properties of pork, 102
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Effect of nutrition, age and size on compensatory growth in two breeds of steers, 1968
Effects of growth rate and compensatory growth on body composition in lambs, 770
Effects of photoperiod on growth, carcass composition, prolactin, growth hormone and cortisol

in prepubertal and postpubertal Holstein heifers, 1804
Fiber and starch levels in fattening rabbit diets, 1897
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018
Heritabilities and genetic correlations of growth and reproductive measurements in Hereford bulls, 409
Implanting young bulls with zeranol from birth to four slaughter ages: III. Growth performance and endocrine aspects, 747
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659
Postweaning performance and carcass characteristics of crossbred ewe lambs produced in accelerated or annual lambing systems, 1063
Prenatal and postnatal influences on growth and fat measurements in swine, 1095
Selection for postweaning gain in rats: I. Correlated response in feed utilization and body composition, 34
Selection for postweaning gain in rats: II. Correlated response in reproductive performance, 46
Selection for postweaning gain in rats: III. Correlated response in maternal performance, 54
Stimulation of pig growth performance by porcine growth hormone and growth hormone-releasing factor, 1389
Swine growth models—Are they appropriate?, 613
The effects of rate of change in body weight on tissue development and meat quality of youthful bulls, 1824
Growth Hormone
Effect of genetic selection for milk yield and increased milking frequency on plasma growth hormone and prolactin concentration in Holstein cows, 1220
Effect of growth hormone-secreting tumors on body composition and feed intake in young female Wistar-Furth rats, 1126

H

Harvest Date
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Effect of harvest date on meadow hay quality. II. Particle size degradation and particulate passage from the rumen of growing cattle, 1538
Heat Production
Net energy value of ammoniated wheat straw, 2044
Heritability
An analysis of body weights and maturing patterns in Western range ewes, 729
Between- and within-breed genetic analysis of calving traits and survival to weaning in beef cattle, 27
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Estimates of heritabilities and correlations of traits associated with pelvic area in beef cattle, 432
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Heritabilities and genetic correlations of growth and reproductive measurements in Hereford bulls, 409
Heritability and repeatability of Hereford showring placing and associated correlations with individual performance measurements and expected progeny differences, 1101
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Prenatal and postnatal influences on growth and fat measurements in swine, 1095
Heterosis
Crossing beef × beef and beef × Brown Swiss: Pregnancy rate, calf survival, weaning age and rate, 8
Direct and maternal genetic effects on preweaning characters of Brahman, Hereford and Brahman-Hereford crossbred cattle, 438
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Lambing date and lamb production of spring-mated Rambouillet, Dorset and Finnsheep ewes and their F_1 crosses, 715
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Histology
The histology of developing porcine adipose tissue, 642
Horses
Concentrations of prolactin, luteinizing hormone and follicle stimulating hormone in pituitary and serum of horses: Effect of sex, season and reproductive state, 854
Daily rhythm of cortisol, and evidence for a photoinducible phase for prolactin secretion in nonpregnant mares housed under non-interrupted and skeleton photoperiods, 169
Effect of meal schedules and fasting on selected plasma free amino acids in horses, 1428
Effects of age and diet on the development of mechanical strength by the third metacarpal and metatarsal bones of young horses, 1432
Equine energetics. I. Relationship between body weight and energy requirements in horses, 815
Equine energetics. II. Energy expenditure in horses during submaximal exercise, 822
Hot Air Treatment
Microwave-oven drying of forage samples collected via esophageal fistula, 595
Human Chorionic Gonadotropin
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184

Hydrogen Peroxide
Effects of alkaline hydrogen peroxide treatment of wheat straw on site and extent of digestion in sheep, 868

I

Identification
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Immunology
Effect of nutritional status, age at weaning and room temperature on growth and systemic immune response of weanling pigs, 1845
Lack of influence of nursery temperature on the response of weanling pigs to supplemental vitamins C and E, 484
Monoclonal antibodies: Pragmatic application of immunology and cell biology, 288
Indexes
Identifying single genes of large effect in quantitative traits using best linear unbiased prediction, 68
Inoculation
Effect of microbial inoculation of whole-plant corn silage on chemical characteristics, preservation and utilization by steers, 1329
Insulin
Implanting young bulls with zeranol from birth to four slaughter ages: III. Growth performance and endocrine aspects, 747
Influence of exogenous growth hormone and gestational diet on sow blood and milk characteristics and on baby pig blood, body composition and performance, 1877
Influence of insulin and energy intake on ovulation rate, lutenizing hormone and progesterone in beef heifers, 1228
Intake
Effect of energy level in lactating sows on yield and composition of milk and nutrient balance of piglets, 1888
Effect of growth hormone-secreting tumors on body composition and feed intake in young female Wistar-Furth rats, 1126
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Forage intake of rangeland beef cows with varying degrees of crossbred influence, 1484
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459
The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078
International Organizations
USAID-supported animal research, 1600
Iron
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905

L

Lactation
Dietary calcium and phosphorus for lactating swine at high and average production levels, 1163
Effect of genetic selection for milk yield and increased milking frequency on plasma growth hormone and prolactin concentration in Holstein cows, 1220
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Effect of lactation and rebreeding phase energy intake on primiparous and multiparous sow performance, 804
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine changes and reproductive performance in primiparous sows, 1915
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156
Improving sow productivity through management during gestation, lactation and after weaning, 1288
Ovarian compensatory hypertrophy following unilateral ovariectomy in the suckled sow, 572
Lactobacillus plantarum
Effect of microbial inoculation of whole-plant corn silage on chemical characteristics, preservation and utilization by steers, 1329
Lambing
Effect of feed treatment and exogenous estrogen and progestogen on puberty and lambing rates in ewe lambs, 1717
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Lasalocid
Effect of lasalocid on fall-calving beef cows, 1722
Potassium and lasalocid effects on performance and digestion in lambs, 685
Ruminal changes in monensin- and lasalocid-fed cattle grazing bloat-provocative alfalfa pasture, 1246
Leaves
Mefluidide effects on smooth brome composition and grazing cow-calf performance, 1054
Lignin
Predicting digestibility of different diets with internal markers: Evaluation of four potential markers, 1476
Lipids
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Effects of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156

Effects of whole cottonseed, cottonseed oil or animal fat on digestibility of wheat straw diets by steers, 1267
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
Yield grades and cutability of carcass beef with and without kidney and pelvic fat, 1134
Litter Size
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Producing more pigs per sow per year—Genetic contributions, 1275
Liver Function
The influence of dose of phenobarbital and interval to measurement on concentration of liver enzymes in barrows and gilts, 1184
Xenobiotic biotransformation in livestock: Comparison to other species commonly used in toxicity testing, 933
Luteinizing Hormone
Concentrations of prolactin, luteinizing hormone and follicle stimulating hormone in pituitary and serum of horses: Effect of sex, season and reproductive state, 854
Effect of active immunization against LHRH or LH in boars: Reproductive consequences and performance traits, 986
Endocrine changes during restoration of estrous cycles following induction of anestrus by restricted nutrient intake in beef heifers, 565
Endogenous opioid modulation of luteinizing hormone and prolactin secretion in postpartum ewes and cows, 838
Influence of calf removal on the serum luteinizing hormone response to naloxone in the postpartum beef cow, 561
Influence of insulin and energy intake on ovulation rate, luteinizing hormone and progesterone in beef heifers, 1228
Opiod inhibition of luteinizing hormone secretion during the postpartum period in suckled beef cows, 1445
Regulation of pulsatile LH secretion by ovarian steroids in the heifer, 162
Lysine
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
Effect on lysine levels in pig starter diets on performance to 20 kg and on subsequent performance and carcass characteristics, 139
Influence of dietary lysine concentration on the oxidation of an indicator amino acid by growing boars, 1179

M

Macerating
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Magnesium
Apparent and true digestibility of magnesium in mature cows of five breeds and their crosses, 189
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983
Effect of potassium on association of minerals with various fractions of digesta and feces of sheep fed hay, 1491
Effects of dietary monensin and potassium on apparent absorption of magnesium and other macroelements in sheep, 1960
Major Genes
Identifying single genes of large effect in quantitative traits using best linear unbiased prediction, 68
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418
Major Histocompatibility Complex
Genetic manipulation of the major histocompatibility complex, 279
Mammary Glands
Effect of oxytocin, prostaglandin $F_{2\alpha}$ and reproductive tract manipulations on uterine contractility in Holstein cows on days 0 and 7 of the estrous cycle, 151
Management
Swine management to increase gilt reproductive efficiency, 1280
Manure
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Utilization by fattening cattle of unfermented manure and two residues produced by anaerobic generation of methane from feedlot manure, 348
Maternal Effects
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Prenatal and postnatal influences on growth and fat measurements in swine, 1095
Selection for postweaning gain in rats: III. Correlated response in maternal performance, 54
Symmetric differences squared and analysis of variance procedures for estimating genetic and environmental variances and covariances for beef cattle weaning weight: I. Comparison via simulation, 1779
Symmetric differences squared and analysis of variance procedure for estimating genetic and environmental variances and covariances for beef cattle weaning weight: II. Estimates from a data set, 1794
Maturity
An analysis of body weights and maturing patterns in Western range ewes, 729
Meat
Carcass properties as related to sensory properties of pork, 102
Early-postmortem measurements and conditioning

in assessing and enhancing meat quality, 622
Effects of breed type and restricted versus ad libitum feeding on fatty acid composition and cholesterol content of muscle and adipose tissue from mature bovine females, 781
Effects of slaughter weight and carcass electrical stimulation on the quality and palatability of beef from young purebred bulls, 1838
Histometrical and chemical analysis of mechanically deboned pork, poultry and veal, 1830
The effects of rate of change in body weight on tissue development and meat quality of youthful bulls, 1824
Yield grades and cutability of carcass beef with and without kidney and pelvic fat, 1134
Mefluidide
Mefluidide effects on smooth brome composition and grazing cow-calf performance, 1054
Metabolism
Changes in metabolic and reproductive characteristics associated with lactation and glucose infusion in the postpartum ewe, 538
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Effect of fasting neonatal piglets on blood hormone and metabolite profiles and on skeletal muscle metabolism, 1418
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine changes and reproductive performance in primiparous sows, 1915
Effect of salinomycin supplementation on characteristics of digestion and feedlot performance of cattle, 1996
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018
Influence of forage level on response of feedlot steers to salinomycin supplementation, 2005
Muscle metabolism and real-time ultrasound measurement of muscle and subcutaneous adipose tissue growth in lambs fed diets containing a beta-agonist, 1410
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
Starch digestion and utilization in ruminants, 1624
Substrate utilization by fetal pig skeletal muscle, 1816
Methionine
Growth and reproductive performance of rabbits on a moderately low crude protein diet with or without methionine or urea supplementation, 795
Methionine, choline and sulfate interrelationships in the diet of weanling swine, 467
Zinc-amino acid complexes for swine, 121
Mice
Genetic manipulation of the major histocompatibility complex, 279
Microbial Nutrition
Whey as a source of rumen-degradable protein. I. Effects on microbial protein production, 1561
Microscopy Methods
Histometrical and chemical analysis of mechanically deboned pork, poultry and veal, 1830
Microsomes
Xenobiotic biotransformation in livestock: Comparison to other species commonly used in toxicity testing, 933
Milk
Breeding system, cow weight and milk yield effects on various biological variables in beef production, 1361
Breeding system, cow weight and milk yield effects on various economic variables in beef production, 1373
Effect of energy level in lactating sows on yield and composition of milk and nutrient balance of piglets, 1888
Mitosis
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659
Mixed Model Methods
Analysis of selection experiments using mixed model methodology, 245
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Recent developments in variance and covariance estimation, 208
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087
Models
An approach to pig growth modeling, 615
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Equilibration and passage of water in the gastrointestinal tract of cattle in relation to estimating body water by compartmental kinetic models, 1400
Estimating particle turnover in the rumen of meal-fed beef steers: Procedural evaluations, 1469
Integration of factors affecting sow efficiency: A modeling approach, 1314
Markers for estimating digesta flow in pigs and the effects of dietary fiber, 1140
Swine growth models—Are they appropriate?, 613
Moisture Content
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
The effects of sorbic acid in high moisture sorghum grain diets on performance of weanling swine, 831
Mold
The effects of sorbic acid in high moisture sorghum grain diets on performance of weanling swine, 831
Monensin
Changes in ruminal concentrations of microbial ammonia and amino acids due to monensin and time, 1990
Effects of dietary monensin and potassium on apparent absorption of magnesium and other macro-elements in sheep, 1960
Response to monensin in cattle during subacute acidosis, 888
Ruminal changes in monensin- and lasalocid-fed

cattle grazing bloat-provocative alfalfa pasture, 1246
Mortality
Effects of marginal selenium deficiency and winter protein supplementation on growth, reproduction and selenium status of beef cattle, 586
Muscles
Early-postmortem measurements and conditioning in assessing and enhancing meat quality, 622
Effect of fasting neonatal piglets on blood hormone and metabolite profiles and on skeletal muscle metabolism, 1418
Muscle metabolism and real-time ultrasound measurement of muscle and subcutaneous adipose tissue growth in lambs fed diets containing a beta-agonist, 1410
Structural analysis of myosin genes using recombinant DNA techniques, 259
Substrate utilization by fetal pig skeletal muscle, 1816
The effects of anabolic agents and breed on the fibers of the longissimus muscle of male cattle, 83
Myosin
Structural analysis of myosin genes using recombinant DNA techniques, 259

N

Naloxone
Endogenous opioid modulation of luteinizing hormone and prolactin secretion in postpartum ewes and cows, 838
Influence of calf removal on the serum luteinizing hormone response to naloxone in the postpartum beef cow, 561
Opioid inhibition of luteinizing hormone secretion during the postpartum period in suckled beef cows, 1445
Neonates
Improving sow efficiency by management to enhance opportunity for nutritional intake by neonatal piglets, 1297
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
Nitrogen
Effect of acid and alkai treatment of soybean meal on nitrogen utilization by ruminants, 879
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310
Nutrition
An approach to pig growth modeling, 615
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Effect of energy intake after weaning on the sexual development of beef bulls. II. Age at first mating, age at puberty, testosterone and scrotal circumference, 579
Effect of fasting neonatal piglets on blood hormone and metabolite profiles and on skeletal muscle metabolism, 1418
Effect of nutrition, age and size on compensatory growth in two breeds of steers, 1968
Effect of nutritional status, age at weaning and room temperature on growth and systemic immune response of weanling pigs, 1845
The role of ciliate protozoa in nutrition of the ruminant, 1547
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078

O

Obesity
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
Opioids
Endogenous opiod modulation of luteinizing hormone and prolactin secretion in postpartum ewes and cows, 838
Opioid inhibition of luteinizing hormone secretion during the postpartum period in suckled beef cows, 1445
Orchardgrass
Effects of sulfur fertilization on composition and digestion of phenolic compounds in tall fescue and orchardgrass, 1926
Ovaries
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Maintenance of the corpus luteum of early pregnancy in the ewe. IV. Changes in luteal sensitivity to prostaglandin $F_{2\alpha}$ throughout early pregnancy, 1201
Ovarian compensatory hypertrophy following unilateral ovariectomy in the suckled sow, 572
Reproductive responses, progesterone profiles and ovarian characteristics of cycling, fine-wool ewes treated with an inhibitor of progesterone synthesis (epostane), 1072
Ovulation
Age, dose of FSH and other factors affecting superovulation in Holstein cows, 176
Influence of insulin and energy intake on ovulation rate, luteinizing hormone and progesterone in beef heifers, 1228
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418
Swine management to increase gilt reproductive efficiency, 1280
Oxidation
Influence of dietary lysine concentration on the oxidation of an indicator amino acid by growing boars, 1179
Oxygen
Equine energetics. II. Energy expenditure in horses during submaximal exercise, 822
Oxytocin
Effect of oxytocin, prostaglandin $F_{2\alpha}$ and reproductive tract manipulations on uterine contractility in Holstein cows on days 0 and 7 of the estrous cycle, 151

P

Palatability
Carcass properties as related to sensory properties of pork, 102
Effects of slaughter weight and carcass electrical stimulation on the quality and palatability of beef from young purebred bulls, 1838
Influence of zeranol implants and electrical stimulation on the palatability traits of five muscles in Angus and Limousin bulls and steers, 114
Longissimus muscle quality, palatability and connective tissue histological characteristics of bulls and steers fed different energy levels and slaughtered at four ages, 92
Proportion of types I and III collagen in longissimus collagen from bulls and steers, 453
The effects of rate of change in body weight on tissue development and meat quality of youthful bulls, 1824
Pancreas
Effects of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Parasympathomimetics
Effects of slaframine on ruminant digestive function: Ruminal motility in sheep and cattle, 1502
Particle Size
Corn particle passage and size reduction in the rumen of beef steers, 1509
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Effect of harvest date on meadow hay quality. II. Particle size degradation and particulate passage from the rumen of growing cattle, 1538
Parturition
Influence of feeding time and diet on time of parturition in multiparous ewes, 1036
Peanuts
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705
Pelvis
Estimates of heritabilities and correlations of traits associated with pelvic area in beef cattle, 432
Performance
Best linear unbiased prediction with the reduced animal model: An application to evaluation of performance-tested males, 1384
Effect of salinomycin supplementation on characteristics of digestion and feedlot performance of cattle, 1996
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Performance of early weaned piglets fed diets containing various amounts of whey protein concentrate, 145
Potassium and lasalocid effects on performance and digestion in lambs, 685
Prediction of traits at constant finish for performance-tested beef cattle, 1108
The effects of soybean oil on nursery air quality and performance of weanling pigs, 1
pH
Early-postmortem measurements and conditioning in assessing and enhancing meat quality, 622
Phenobarbital
The influence of dose of phenobarbital and interval to measurement on concentration of liver enzymes in barrows and gilts, 1184
Phenolic Content
Effects of sulfur fertilization on composition and digestion of phenolic compounds in tall fescue and orchardgrass, 1926
Phenylalanine
Influence of dietary lysine concentration on the oxidation of an indicator amino acid by growing boars, 1179
Phosphatidylinositols
The reversible inhibition of myoblast proliferation by γ-hexachlorocyclohexane, 326
Phosphorus
Dietary calcium and phosphorus for lactating swine at high and average production levels, 1163
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983
Effect of various calcium:phosphorus ratios at low and high dietary phosphorus for starter, grower and finishing swine, 457
Photoperiod
Daily rhythm of cortisol, and evidence for a photoindicible phase for prolactin secretion in nonpregnant mares housed under non-interrupted and skeleton photoperiods, 169
Effects of photoperiod on growth, carcass composition, prolactin, growth hormone and cortisol in prepubertal and postpubertal Holstein heifers, 1804
Picolinic Acid
Zinc-amino acid complexes for swine, 121
Pigs
Aerosolized 5α-androst-16-en-3-one reduced agonistic behavior and temporarily improved performance of growing pigs, 679
An approach to pig growth modeling, 615
Comparative availability of amino acids in OAC Wintri triticale and corn for pigs, 1862
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854
Comparison of plasma free-fatty-acid and blood-glycerol concentrations with measurement of lipolysis in porcine adipose tissue in vitro, 757
Diarrhea: The nemesis of the artificially reared, early weaned piglet and a strategy for defense, 1307
Dietary calcium and phosphorus for lactating swine at high and average production levels, 1163
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Dose-response shift in the ability of gilts to remain pregnant following exogenous estradiol-17β exposure, 1208
Effect of active immunization against LHRH or LH in boars: Reproductive consequences and performance traits, 986
Effect of dietary fluorine on growth, blood and bone characteristics of growing-finishing pigs,

2053
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
Effect of energy level in lactating sows on yield and composition of milk and nutrient balance of piglets, 1888
Effect of fasting neonatal piglets on blood hormone and metabolite profiles and on skeletal muscle metabolism, 1418
Effect of lactation and rebreeding phase energy intake on primiparous and multiparous sow performance, 804
Effect of lysine levels in pig starter diets on performance to 20 kg and on subsequent performance and carcass characteristics, 139
Effect of nutritional status, age at weaning and room temperature on growth and systemic immune response of weanling pigs, 1845
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine changes and reproductive performance in primiparous sows, 1915
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Effect of various calcium:phosphorus ratios at low and high dietary phosphorus for starter, grower and finishing swine, 457
Effets of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156
Effects of nitrogen and energy source on nutrient digestibility in the young pig, 492
Future meat-animal composition: Industry adaptation of new technologies, 633
Genetic and maternal effects on pig weights, growth and probe backfat in diallel crosses of high- and low-fat lines of swine, 395
Genetic engineering of mammalian embryos, 269
Genetic manipulation of the major histocompatibility complex, 279
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905
Improving sow efficiency by management to enhance opportunity for nutritional intake by neonatal piglets, 1297
Improving sow productivity through management during gestation, lactation and after weaning, 1288
Influence of dietary lysine concentration on the oxidation of an indicator amino acid by growing boars, 1179
Influence of exogenous growth hormone and gestational diet on sow blood and milk characteristics and on baby pig blood, body composition and performance, 1877
Integration of factors affecting sow efficiency: A modeling approach, 1314
Intrauterine migration of the porcine embryo: Coordination of bead migration with estradiol, 848
Lack of influence of nursery temperature on the response of weanling pigs to supplemental vitamins C and E, 484
Low concentrations of zearalenone in diets of boars for a prolonged period of time, 1197
Low concentrations of zearalenone in diets of mature gilts, 1191
Markers for estimating digesta flow in pigs and the effects of dietary fiber, 1140
Methionine, choline and sulfate interrelationships in the diet of weanling swine, 467
Milk versus soybean protein sources for pigs: I. Effects on performance and digestibility, 505
Milk versus soybean protein sources for pigs: II. Effects on amino acid availability, 513
Mitotic activity in fetal and early postnatal porcine adipose tissue, 659
Ovarian compensatory hypertrophy following unilateral ovariectomy in the suckled sow, 572
Performance of early weaned piglets fed diets containing various amounts of whey protein concentrate, 145
Postnatal expression of adipose tissue metabolic activity associated with a porcine genetic obesity, 741
Prenatal and postnatal influences on growth and fat measurements in swine, 1095
Producing more pigs per sow per year—Genetic contributions, 1275
Response of nonpregnant versus pregnant gilts and their fetuses to severe feed restriction, 472
Responses to dietary additions of fiber (alfalfa meal) in growing pigs housed in a cold, warm or hot thermal environment, 1870
Serum folates in gestating swine after folic acid addition to diet, 1173
Stimulation of pig growth performance by porcine growth hormone and growth hormone-releasing factor, 1389
Substrate utilization by fetal pig skeletal muscle, 1816
Swine growth models—Are they appropriate?, 613
Swine management to increase gilt reproductive efficiency, 1280
The effects of sorbic acid in high moisture sorghum grain diets on performance of weanling swine, 831
The effects of soybean oil on nursery air quality and performance of weanling pigs, 1
The histology of developing porcine adipose tissue, 642
The influence of dose of phenobarbital and interval to measurement on concentration of liver enzymes in barrows and gilts, 1184
Toxic effects of supplemental copper and roxarsone when fed alone or in combination to young pigs, 533
Zinc-amino acid complexes for swine, 121
Placenta
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184
Postpartum Interval
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine

changes and reproductive performance in primiparous sows, 1915
Endogenous opioid modulation of luteinizing hormone and prolactin secretion in postpartum ewes and cows, 838
Potassium
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983
Effect of potassium on association of minerals with various fractions of digesta and feces of sheep fed hay, 1491
Effects of dietary monensin and potassium on apparent absorption of magnesium and other macroelements in sheep, 1960
Potassium and lasalocid effects on performance and digestion in lambs, 685
Prediction
Bayesian methods in animal breeding theory, 217
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Prediction of traits at constant finish for performance-tested beef cattle, 1108
Ultrasonic scanning and body measurements for predicting composition and muscle distribution in young Holstein × Friesian bulls, 1337
Yield grades and cutability of carcass beef with and without kidney and pelvic fat, 1134
Pregnancy
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Crossing beef × beef and beef × Brown Swiss: Pregnancy rate, calf survival, weaning age and rate, 8
Effect of restriction of energy during lactation on body condition, energy metabolism, endocrine changes and reproductive performance in primiparous sows, 1915
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184
Maintenance of the corpus luteum of early pregnancy in the ewe. IV. Changes in luteal sensitivity to prostaglandin $F_{2\alpha}$ throughout early pregnancy, 1201
Response of nonpregnant versus pregnant gilts and their fetuses to severe feed restriction, 472
Prepubertal Period
Effects of photoperiod on growth, carcass composition, prolactin, growth hormone and cortisol in prepubertal and postpubertal Holstein heifers, 1804
Preweaning Period
Direct and maternal genetic effects on preweaning characters of Brahman, Hereford and Brahman-Hereford crossbred cattle, 438
Principal Component Analysis
Calfhood weights, body measurements and measures of fatness versus criteria of overall size and shape for predicting yearling performance in beef cattle, 447
Productivity
Producing more pigs per sow per year—Genetic contributions, 1275
Progestogens
Effect of feed treatment and exogenous estrogen and progestogen on puberty and lambing rates in ewe lambs, 1717
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184
Influence of insuline and energy intake on ovulation rate, luteinizing hormone and progesterone in beef heifers, 1228
Nonpuberal estrus in beef heifers, 1049
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Regulation of pulsatile LH secretion by ovarian steroids in the heifer, 162
Reproductive responses, progesterone profiles and ovarian characteristics of cycling, fine-wool ewes treated with an inhibitor of progesterone synthesis (epostane), 1072
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prostaglandin $F_{2\alpha}$, 343
Prolactin
Concentrations of prolactin, luteinizing hormone and follicle stimulating hormone in pituitary and serum of horses: Effect of sex, season and reproductive state, 854
Daily rhythm of cortisol, and evidence for a photo-inducible phase for prolactin secretion in nonpregnant mares housed under non-interrupted and skeleton photoperiods, 169
Effect of genetic selection for milk yield and increased milking frequency on plasma growth hormone and prolactin concentration in Holstein cows, 1220
Endogenous opioid modulation of luteinizing hormone and prolactin secretion in postpartum ewes and cows, 838
Propionic Acid
Starch digestion and utilization in ruminants, 1624
Prostaglandins
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Effect of oxytocin, prostaglandin $F_{2\alpha}$ and reproductive tract manipulations on uterine contractility in Holstein cows on days 0 and 7 of the estrous cycle, 151
Maintenance of the corpus luteum of early pregnancy in the ewe. IV. Changes in luteal sensitivity to prostaglandin $F_{2\alpha}$ throughout early pregnancy, 1201
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prostaglandin $F_{2\alpha}$, 343
Proteins
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854
Digestibility and utilization of energy and protein in screened swine waste solids by gestating gilts, 1150
Effects of age and diet on the development of mechanical strength by the third metacarpal and metatarsal bones of young horses, 1432
Effects of marginal selenium deficiency and winter

protein supplementation on growth, reproduction and selenium status of beef cattle, 586
Effects of nitrogen and energy source on nutrient digestibility in the young pig, 492
Evaluation of alfalfa-corn cob associative action. I. Interactions between alfalfa hay and ruminal escape protein on growth of lambs and steers, 894
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Milk versus soybean protein sources for pigs: I. Effects on performance and digestibility, 505
Milk versus soybean protein sources for pigs: II. Effects on amino acid availability, 513
Whey as a source of rumen-degradable protein, I. Effects on microbial protein production, 1561
Whey as a source of rumen-degradable protein. II. For growing ruminants, 1574

Protozoa
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
The role of ciliate protozoa in nutrition of the ruminant, 1547

Pseudopregnancy
Low concentrations of zearalenone in diets of mature gilts, 1191

Puberty
Effect of energy intake after weaning on the sexual development of beef bulls. II. Age at first mating, age at puberty, testosterone and scrotal circumference, 579
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Nonpuberal estrus in beef heifers, 1049
Swine management to increase gilt reproductive efficiency, 1280

Q

Quantitative Techniques
Histometrical and chemical analysis of mechanically deboned pork, poultry and veal, 1830

R

Rabbits
Fiber and starch levels in fattening rabbit diets, 1897
Genetic engineering of mammalian embryos, 269
Growth and reproductive performance of rabbits on a moderately low crude protein diet with or without methionine or urea supplementation, 795
Potentials of rabbit production in tropical and subtropical agricultural systems, 1581

Rangelands
Forage intake of rangeland beef cows with varying degrees of crossbred influence, 1484

Rats
Selection for postweaning gain in rats: I. Correlated response in feed utilization and body composition, 34
Selection for postweaning gain in rats: II. Correlated response in reproductive performance, 46
Selection for postweaning gain in rats: III. Correlated response in maternal performance, 54

Rearing Techniques
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018

Reconstitution
Effect of dry, high-moisture and reconstituted normal and high-lysine corn diets and particle size on energy and nitrogen metabolism in growing swine, 131
The effects of sorbic acid in high moisture sorghum grain diets on performance of weanling swine, 831

Repeatability
Heritability and repeatability of Hereford showring placing and associated correlations with individual performance measurements and expected progeny differences, 1101
Lambing date and lamb production of spring-mated Rambouillet, Dorset and Finnsheep ewes and their F_1 crosses, 715
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418

Reproduction
Changes in metabolic and reproductive characteristics associated with lactation and glucose infusion in the postpartum ewe, 538
Crossing beef × beef and beef × Brown Swiss: Pregnancy rate, calf survival, weaning age and rate, 8
Dietary calcium and phosphorus for lactating swine at high and average production levels, 1163
Effect of energy intake after weaning on the sexual development of beef bulls. II. Age at first mating, age at puberty, testosterone and scrotal circumference, 579
Effect of oxytocin, prostaglandin $F_{2\alpha}$ and reproductive tract manipulations on uterine contractility in Holstein cows on days 0 and 7 of the estrous cycle, 151
Effect of unilateral cornual insemination upon fertilization rate in superovulating and single-ovulating cattle, 551
Genetic manipulation of the major histocompatibility complex, 279
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Glycosaminoglycans in ewe reproductive tracts and their influence on acrosome reactions in bovine spermatozoa in vitro, 861
Growth and reproductive performance of rabbits on a moderately low crude protein diet with or without methionine or urea supplementation, 795

Heritabilities and genetic correlations of growth and reproductive measurements in Hereford bulls, 409
Improving sow productivity through management during gestation, lactation and after weaning, 1288
Integration of factors affecting sow efficiency: A modeling approach, 1314
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Low concentrations of zearalenone in diets of boars for a prolonged period of time, 1197
Low concentrations of zearalenone in diets of mature gilts, 1191
Ovarian compensatory hypertophy following unilateral ovariectomy in the suckled sow, 572
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418
Reproductive responses, progesterone profiles and ovarian characteristics of cycling, fine-wool ewes treated with an inhibitor of progesterone synthesis (epostane), 1072
Selection for postweaning gain in rats: II. Correlated response in reproductive performance, 46
Synchronized estrus and fertility of beef cows after weaning calves for short intervals, 369

Retention
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527

Return Interval
Effect of lactation and rebreeding phase energy intake on primiparous and multiparous sow performance, 804

Rotavirus
Diarrhea: The nemesis of the artificially reared, early weaned piglet and a strategy for defense, 1307

Roughage
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983

Roxarsone
Toxic effects of supplemental copper and roxarsone when fed alone or in combination to young pigs, 533

Rumen
Changes in ruminal concentrations of microbial ammonia and amino acids due to monensin and time, 1990
Comparison of various amino acids for estimation of microbial nitrogen in digesta, 603
Corn particle passage and size reduction in the rumen of beef steers, 1509
Effect of harvest date on meadow hay quality. I. Nutritional attributes, voluntary intake and rate of passage in growing cattle, 1527
Effect of harvest date on meadow hay quality. II. Particle size degradation and particulate passage from the rumen of growing cattle, 1538
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923
Effects of slaframine on ruminant digestive function: Ruminal motility in sheep and cattle, 1502
Evaluation of alfalfa-corn cob associative action. I. Interactions between alfalfa hay and ruminal escape protein on growth of lambs and steers, 894
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Evaluation of alfalfa-corn cob associative action. III. The effect of mechanically separated alfalfa fractions on intake, digestibility and ruminal characteristics of ammonia-treated corn cob diets fed to sheep, 911
Interaction of ruminal bacteria and fungi with southern forages, 962
Plasma, rumen and urine pools in urea dilution determination of body composition in cattle, 77
Potassium and lasalocid effects on performance and digestion in lambs, 685
Potential for manipulation of the rumen fermentation through the use of recombinant DNA techniques, 310
Ruminal changes in monensin- and lasalocid-fed cattle grazing bloat-provocative alfalfa pasture, 1246
Starch digestion and utilization in ruminants, 1624
Sulfur influences on rumen microorganisms in vitro and in sheep and calves, 1949
The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737

Ryegrass
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459

S

Salinomycin
Effect of salinomycin supplementation on characteristics of digestion and feedlot performance of cattle,.1996
Influence of forage level on response of feedlot steers to salinomycin supplementation, 2005

Selection
Analysis of selection experiments using mixed model methodology, 245
Developing better forages for the South, 955
Effect of genetic selection for milk yield and increased milking frequency on plasma growth hormone and prolactin concentration in Holstein cows, 1220
Effect of misidentification on the estimation of breeding value and heritability in cattle, 1759
Producing more pigs per sow per year—Genetic contributions, 1275
Recent developments in variance and covariance estimation, 208
Selection for postweaning gain in rats: I. Correlated response in feed utilization and body composition, 34
Selection for postweaning gain in rats: II. Correlated response in reproductive performance, 46

Selection for postweaning gain in rats: III. Correlated response in maternal performance, 54
Within-herd phenotypic, genetic and environmental trend lines for beef cattle breeders, 1087
Selenium
Effects of marginal selenium deficiency and winter protein supplementation on growth, reproduction and selenium status of beef cattle, 586
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905
Methionine, choline and sulfate interrelationships in the diet of weanling swine, 467
Self Sterility
Developing better forages for the South, 955
Sheep
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Acetyl-CoA carboxylase of sheep adipose tissue: Problems of the assay and adaptation during fetal development, 1119
An analysis of body weights and maturing patterns in Western range ewes, 729
Aspects of the antiluteolytic activity of the conceptus during early pregnancy in ewes, 1449
Changes in metabolic and reproductive characteristics associated with lactation and glucose infusion in the postpartum ewe, 538
Comparison of the effects of three methods of harvesting and storing alfalfa on nutrient digestibility by lambs and feedlot performance of steers, 1026
Effect of acid and alkali treatment of soybean meal on nitrogen utilization by ruminants, 879
Effect of dietary phosphorus and roughage levels on calcium, magnesium and potassium utilization by sheep, 1983
Effect of feed treatment and exogenous estrogen and progestogen on puberty and lambing rates in ewe lambs, 1717
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Effect of potassium on association of minerals with various fractions of digesta and feces of sheep fed hay, 1491
Effects of alkaline hydrogen peroxide treatment of wheat straw on site and extent of digestion in sheep, 868
Effects of dietary monensin and potassium on apparent absorption of magnesium and other macroelements in sheep, 1960
Effects of growth rate and compensatory growth on body composition in lambs, 770
Effects of human chorionic gonadotropin and cyclic adenosine monophosphate on progesterone secretion by the ovine placenta, 184
Effects of slaframine on ruminant digestive function: Ruminal motility in sheep and cattle, 1502
Etiology of ammoniated hay toxicosis, 525
Genetic engineering of mammalian embryos, 269
Grain processing effects on starch utilization by ruminants, 1649
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018
Influence of feeding time and diet on time of parturition in multiparous ewes, 1036
Lambing date and lamb production of spring-mated Rambouillet, Dorset and Finnsheep ewes and their F_1 crosses, 715
Lambing performance of Morlam and Dorset ewes under accelerated lambing systems, 1769
Maintenance of the corpus luteum of early pregnancy in the ewe. IV. Changes in luteal sensitivity to prostaglandin $F_{2\alpha}$ throughout early pregnancy, 1201
Postweaning performance and carcass characteristics of crossbred ewe lambs produced in accelerated or annual lambing systems, 1063
Potassium and lasalocid effects on performance and digestion in lambs, 685
Processing characteristics of Polypay wool, 692
Reproduction in Javanese sheep: Evidence for a gene with large effect on ovulation rate and litter size, 418
Reproductive responses, progesterone profiles and ovarian characteristics of cycling, fine-wool ewes treated with an inhibitor of progesterone synthesis (epostane), 1072
Sheep and goats in tropical and subtropical agricultural systems, 1587
Sulfur influences on rumen microorganisms in vitro and in sheep and calves, 1949
The INRA "fill unit" system for predicting the voluntary intake of forage-based diets in ruminants: A review, 1737
The role of ciliate protozoa in nutrition of the ruminant, 1547
The voluntary forage intake and nutrition of goats and sheep in the semi-arid tropics of northeastern Brazil, 1078
Silage
Comparison of the effects of three methods of harvesting and storing alfalfa on nutrient digestibility by lambs and feedlot performance of steers, 1026
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923
Ensiling characteristics of tropical grasses as influenced by stage of growth, additives and chopping length, 197
Short rotation, hardwood tree biomass as potential ruminant feed—Chemical composition, nylon bag ruminal degradation and ensilement of selected species, 2028
Slaughter Weight
Effects of slaughter weight and carcass electrical stimulation on the quality and palatability of beef from young purebred bulls, 1838
Smooth Brome
Evaluation of alfalfa-corn cob associative action. II. Comparative tests of alfalfa hay as a source of ruminal degradable protein, 902
Mefluidide effects on smooth brome composition and grazing cow-calf performance, 1054
Sodium Bicarbonate
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923

The effects of corn silage dry matter content and sodium bicarbonate addition on nutrient digestion and growth by lambs and calves, 1728
Solubility
Effect of potassium on association of minerals with various fractions of digesta and feces of sheep fed hay, 1491
Somatotropin
Effect of fasting neonatal piglets on blood hormone and metabolite profiles and on skeletal muscle metabolism, 1418
Effect of growth hormone-secreting tumors on body composition and feed intake in young female Wistar-Furth rats, 1126
Genetic engineering of mammalian embryos, 269
Influence of exogenous growth hormone and gestational diet on sow blood and milk characteristics and on baby pig blood, body composition and performance, 1877
Response of nonpregnant versus pregnant gilts and their fetuses to severe feed restriction, 472
Stimulation of pig growth performance by porcine growth hormone and growth hormone-releasing factor, 1389
Sorbic Acid
The effects of sorbic acid in high mojsture sorghum grain diets on performance of weanling swine, 831
Sorghum
Effect of sodium bicarbonate and sodium bentonite on digestion, solid and liquid flow, and ruminal fermentation characteristics of forage sorghum silage-based diets fed to steers, 923
Factors affecting starch digestibility with special emphasis on sorghum and corn, 1607
Grain processing effects on starch utilization by ruminants, 1649
Limits to starch digestion in the ruminant small intestine, 1634
Regulation of voluntary intake of ryegrass and sorghum forages in cattle by indigestible neutral detergent fiber, 1459
Soybeans
Effect of acid and alkali treatment of soybean meal on nitrogen utilization by ruminants, 879
Milk versus soybean protein sources for pigs: I. Effects on performance and digestibility, 505
Milk versus soybean protein sources for pigs: II. Effects on amino acid availability, 513
Nitrogen balance and amino acid disappearance from the small intestine in calves fed soybean meal-, toasted soybean meal- or corn gluten meal-supplemented diets, 1258
The effects of soybean oil on nursery air quality and performance of weanling pigs, 1
Whey as a source of rumen-degradable protein. I. Effects on microbial protein production, 1561
Whey as a source of rumen-degradable protein. II. For growing ruminants, 1574
Sperm
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Effect of unilateral cornual insemination upon fertilization rate in superovulating and single-ovulating cattle, 551
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995
Glycosaminoglycans in ewe reproductive tracts and their influence on acrosome reactions in bovine spermatozoa in vitro, 861
Starch
Factors affecting starch digestibility with special emphasis on sorghum and corn, 1607
Fiber and starch levels in fattening rabbit diets, 1897
Grain processing effects on starch utilization by ruminants, 1649
Limits to starch digestion in the ruminant small intestine, 1634
Starch digestion and utilization in ruminants, 1624
Statistical Methods
Repeated measurement: Sensitive tests for experiments with few animals, 943
Stems
Mefluidide effects on smooth brome composition and grazing cow-calf performance, 1054
Subtropics
Sheep and goats in tropical and subtropical agricultural systems, 1587
Sulfadimidine
Short-term effect of antibiotic feeding on site and extent of digestion of growing and finishing diets in feedlot cattle, 2013
Sulfur
Effect of sulfur fertilization on chemical composition, ensiling characteristics and utilization of corn silage by lambs, 1236
Effects of sulfur fertilization on composition and digestion of phenolic compounds in tall fescue and orchardgrass, 1926
Methionine, choline and sulfate interrelationships in the diet of weanling swine, 467
Sulfur influences on rumen microorganisms in vitro and in sheep and calves, 1949
Survival
Between- and within-breed genetic analysis of calving traits and survival to weaning in beef cattle, 27
Effects of dietary additions of 1,3-butanediol or lard for sows on survival of neonatal pigs, 1156
Improving sow efficiency by management to enhance opportunity for nutritional intake by neonatal piglets, 1297
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Synchronization
Progestin and prostaglandin for estrous synchronization in beef heifers, 700
Synchronization of estrus in postpartum beef cows with melengestrol acetate and prostaglandin F2a, 343
Synchronized estrus and fertility of beef cows after weaning calves for short intervals, 369

T

Tannins
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705

Temperature
Early-postmortem measurements and conditioning in assessing and enhancing meat quality, 622
Effect of nutritional status, age at weaning and room temperature on growth and systemic immune response of weanling pigs, 1845
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Lack of influence of nursery temperature on the response of weanling pigs to supplemental vitamins C and E, 484
Responses to dietary additions of fiber (alfalfa meal) in growing pigs housed in a cold, warm or hot thermal environment, 1870
Testes
Effect of season and social environment of testis size and semen quality of the adult Landrace boar, 1211
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995
Genetic parameter estimates for reproductive traits of male and female littermate swine, 377
Genetic variation in testicular development and its relationship to female reproductive traits in swine, 17
Testosterone
Effect of active immunization against LHRH or LH in boars: Reproductive consequences and performance traits, 986
Effect of energy intake after weaning on the sexual development of beef bulls. II. Age at first mating, age at puberty, testosterone and scrotal circumference, 579
Implanting young bulls with zeranol from birth to four slaughter ages: III. Growth performance and endocrine aspects, 747
Thirst
A comparative study of feeding behavior and digestive function in dairy goats, wool sheep and hair sheep, 1516
Toxicity
Etiology of ammoniated hay toxicosis, 525
Xenobiotic biotransformation in livestock: Comparison to other species commonly used in toxicity testing, 933
Tracers
Evaluation of urea dilution as a technique for estimating body composition of beef steers in vivo: Validation of published equations and comparison with chemical composition, 1935
Transformations
Monclonal antibodies: Pragmatic application of immunology and cell biology, 288
Transmissible Gastroenteritis Virus
Diarrhea: the nemesis of the artificially reared, early weaned piglet and a strategy for defense, 1307
Trenbolone
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Triticale
Comparative availability of amino acids in OAC Wintri triticale and corn for pigs, 1862
Comparative protein and energy value of OAC Wintri triticale and corn for pigs, 1854
Tropics
Ensiling characteristics of tropical grasses as influenced by stage of growth, additives and chopping length, 197
Potentials of rabbit production in tropical and subtropical agricultural systems, 1581
Sheep and goats in tropical and subtropical agricultural systems, 1587

U

Ultrasonics
Muscle metabolism and real-time ultrasound measurement of muscle and subcutaneous adipose tissue growth in lambs fed diets containing a beta-agonist, 1410
Prediction of mature cow carcass composition from live animal measurements, 1041
Ultrasonic scanning and body measurements for predicting composition and muscle distribution in young Holstein × Friesian bulls, 1337
Urea
Digestibility and utilization of ammonia-treated and urea-supplemented peanut skin diets fed to cattle, 705
Evaluation of urea dilution as a technique for estimating body composition of beef steers in vivo: Validation of published equations and comparison with chemical composition, 1935
Growth and reproductive performance of rabbits on a moderately low crude protein diet with or without methionine or urea supplementation, 795
Plasma, rumen and urine pools in urea dilution determination of body composition in cattle, 77
Whey as a source of rumen-degradable protein. I. Effects on microbial protein production, 1561
Whey as a source of rumen-degradable protein. II. For growing ruminants, 1574
Urine
Plasma, rumen and urine pools in urea dilution determination of body composition in cattle, 77

V

Variance Components
Estimates of beef growth trait variances and heritabilities determined from field records, 386
Variance-Covaraince Matrix
Recent developments in variance and covariance estimation, 208
Repeated measurement: Sensitive tests for experiments with few animals, 943
Vitamins
Importance of diet of dam and colostrum to the biological antioxidant status and parenteral iron tolerance of the pig, 1905
Lack of influence of nursery temperature on the response of weanling pigs to supplemental vitamins C and E, 484

Methionine, choline and sulfate interrelationships in the diet of weanling swine, 467
Serum folates in gestating swine after folic acid addition to diet, 1173

W

Weaning
Effect of nutritional status, age at weaning and room temperature on growth and systemic immune response of weanling pigs, 1845
Effects of nitrogen and energy source on nutrient digestibility in the young pig, 492
Growth, intakes and metabolic responses of artificially reared lambs weaned at 14 d of age, 2018
Milk versus soybean protein sources for pigs: I. Effects on performance and digestibility, 505
Milk versus soybean protein sources for pigs: II. Effects on amino acid availability, 513
Synchronized estrus and fertility of beef cows after weaning calves for short intervals, 369
Weaning Weight
Direct and maternal genetic effects on preweaning characters of Brahman, Hereford and Brahman-Hereford crossbred cattle, 438
Production characters of first generation cows of a five-breed diallel: Reproduction of mature cows and preweaning performance of calves by two third-breed sires, 59
Wheat Straw
Effects of alkaline hydrogen peroxide treatment of wheat straw on site and extent of digestion in sheep, 868
Effects of whole cottonseed, cottonseed oil or animal fat on digestibility of wheat straw diets by steers, 1267
Net energy value of ammoniated wheat straw, 2044
Whey
Effects of age and diet on the development of the pancreas and the synthesis and secretion of pancreatic enzymes in the young pig, 497
Performance of early weaned piglets fed diets containing various amounts of whey protein concentrate, 145
Whey as a source of rumen-degradable protein. I. Effects on microbial protein production, 1561
Whey as a source of rumen-degradable protein. II. For growing ruminants, 1574
Woody Plants
Short rotation, hardwood tree biomass as potential ruminant feed—Chemical composition, nylon bag ruminal degradation and ensilement of selected species, 2028
Wool
Processing characteristics of Polypay wool, 692

X

Xenobiotics
Xenobiotic biotransformation in livestock: Comparison to other species commonly used in toxicity testing, 933
Xenogeneic Fusions
Monoclonal antibodies: Pragmatic application of immunology and cell biology, 288

Z

Zearalenone
Low concentrations of zearalenone in diets of boars for a prolonged period of time, 1197
Low concentrations of zearalenone in diets of mature gilts, 1191
Zeranol
Effects of zeranol and trenbolone acetate on testis function, live weight gain and carcass traits of bulls, 358
Flow cytometry evaluation of testicular and sperm cells obtained from bulls implanted with zeranol, 995
Implanting young bulls with zeranol from birth to four slaughter ages: III. Growth performance and endocrine aspects, 747
Influence of zeranol implants and electrical stimulation on the palatability traits of five muscles in Angus and Limousin bulls and steers, 114
Zinc
Effect of gestation-lactation diet calcium and zinc levels and of parenteral vitamins A, D and E during gestation on ewe body weight and on lamb weight and survival, 1019
Zinc-amino acid complexes for swine, 121
